5 Year Strategic Technology Plan

Each year a tactical one year plan will be created with specific projects that fall into one or more of the following longer term themes. The themes encompass the categories of projects that will vary from year to year but have a common overarching purpose. Each of the themes align with and enable Lane's Vision, Mission, Strategic Directions, and Core Values.

1. **FastLANE:** Provide appropriate, sustainably fast, hardware & software that is reliable, secure and allows students and employees to work effectively in classrooms, offices, labs and other learning areas.
2. **AnalyzeLANE:** Continue the development of reporting tools, dashboards and business analytics to give employees of LANE actionable information to achieve the mission of the college.
3. **DegreeLANE:** Provide tools for student success and completion. This includes projects relating to recruiting, retaining, educating, completing, and transitioning students.
4. **AgileLANE:** Provide project leadership and management for the information systems projects of the college.
5. **StreamLANE:** Provide business process redesign and systems analysis services to help improve systems and processes throughout the college.
6. **DigitalLANE:** Provide a cohesive, integrated, accessible, digital presence that serves the needs of students, faculty and staff.
7. **SustainLANE:** Provide enterprise resource planning system services (ERP) and Learning Management Software (LMS) to support college administrative and teaching operations. Maintain the servers and systems software through operating system and application upgrades. Evaluate, implement, and communicate about new software and hardware releases to faculty, staff and students. Keep services highly available and accessible to as many device types as possible without compromising security. Provide adequate local and wide-area network wired and wireless services for the campus.
8. **LANEOnline:** Provide appropriate technologies and course development strategies to enable effective instruction across face-to-face, hybrid and online modalities. Support sustainable teaching and learning practices such as Open Educational Resources (OER) adoption and implementation. Support faculty to implement student centered learning through standards based instructional design.
9. **InnovateLANE:** Keep a watchful eye on the horizon for emerging tools, processes and methods, allowing for exploration, experimentation and play. Listen to and try to implement good ideas from all constituencies.

2015 Short-term Technology Plan

We plan to address the issues raised in the survey summarized below by a series of projects and initiatives many of which are underway. The survey issues are below:

Student Focused Initiatives

1. Train faculty and advocate for a more unified and consistent course layout in Moodle.
2. Increased computer lab access (workstations and hours) across campuses (Main and Downtown).
3. More comprehensive wireless (WiFi) access on campus.
4. Email for Lane students
5. Mobile apps for Moodle/Learning
6. Mobile app for the school (maps, ability to register for classes)
7. Access to up to date software in centralized lab locations to offset computer classroom use as labs.
8. A clearer, less cluttered website
9. Updated computers in classrooms and labs
10. Access to computer checkout for students
11. Technology/digital literacy trainings for students
12. Printing issues

Faculty/Staff Initiatives

1. Access to enough computer classrooms
2. Access to up-to-date software
3. Slow computers need replacing
4. More LMS trainings
5. Digital literacy assessment/training for students
6. Single sign-on (SSO) so that you log in with your info once and the credentials work across all the college's systems.
7. A better ticketing system for support
8. More comprehensive wireless (WiFi) access on campus.
9. Email for students
10. Improved Mac support
11. Professional Development for staff
12. A different email solution than GW
13. Support staff at the downtown campus
14. Employee Communication Policy

Annual Plan

- Continue to develop the approved hardware and software process
- Encourage network storage use for Lane documents
- Continue to improve internal change control processes
- Expand support for end-user devices like smart phones and tablets on the network
- Implement Gmail for students with a “.edu” domain and Google Apps for Education
- Achieve PCI Compliance for all credit card transactions throughout the college
- Expand wireless access locations especially in the CLASS project area
- Investigate and possibly implement a Lane mobile app that provides similar information to myLane
- Implement a Single Sign On portal
- Develop or purchase a robust student messaging application that can be used to email or text students with important college related information
- Implement Banner XE registration and XE Attendance tracking
- Expand development and use of Argos reports and dashboards across the college
- Begin Degreeworks planner implementation
- develop failover capacity between downtown and main campus servers
- Implement CIT virtual bench lab
- Develop a tool for the CTE program updates
- Improve the PTSOA process for administrative assistants and HR
- Business continuity infrastructure upgrades and additions
- Groupwise server software upgrades
- Improve Macintosh integration on network
- Smart classroom implementations and updates
- Audio recording studio upgrade
- TV station upgrade
- Miscellaneous infrastructure upgrades, patches, and changes
- Website changes relating to College of Arts and Sciences name change
- Encourage and enable OER development among faculty
- Work to get approval for an online course fee to raise funds to ensure adequate development and support of online courses as well as sustain resources.
