

Is a math hybrid class right for you?

A hybrid class is a blend of online and in-person instruction.

Class time may include:

- Interactions with instructor & students
- Taking exams in or out of class time
- Demonstrations & explanations
- Projects & other assignments
- In-class activities

Online time may include:

- Reading text & class material
- Reading emails from instructor
- Doing homework online
- Taking quizzes
- Viewing videos

Do you have reliable internet access?

Can you complete online work and attend classes?

Can you work with web site instruction independently?

Can you learn from books or videos as well as lecture?

If yes, a math hybrid course might be a good choice for you.
